Who am I?

I'm a **bilingual (English/French) IT and data professional with over three years of experience in data integration, analysis, and automation**. Skilled in transforming, validating, and analyzing data from multiple sources using Python (pandas, NumPy), SQL, and Azure-based tools. Experienced in API testing, JSON payload mapping, and building automated workflows that improve data quality and operational efficiency, most notably implementing an automation system that saved approximately \$500,000 CAD annually. Proficient in visualizing insights and monitoring systems with Power BI, Grafana, and Databricks. Passionate about delivering actionable, data-driven solutions and enabling stakeholders to make informed decisions through reliable data pipelines and dashboards.

WORK EXPERIENCE

DHL Express (Canada)

Brampton, Ontario, Canada

Bilingual Customer Facing IT Specialist

Oct 2025 – Jan 2026

- **Business IT Support:** Manage inbound IT tickets from business customers on DHL platforms using ServiceNow, ensuring timely and accurate resolution of technical issues. Diagnose system problems, reproduce errors, and collaborate with engineers on escalated cases. Communicate bilingually (English/French) with customers to provide clear guidance and follow-ups. Develop lightweight scripts to streamline recurring ticket resolutions, improving efficiency and consistency.
- **API Integration Support:** Map and validate customer JSON payloads and API keys to internal schemas, ensuring proper routing and data integrity. Use Postman to test endpoints, run HTTP requests, and troubleshoot integration errors, collaborating with engineering teams for complex issues. Document recurring patterns and schema mismatches to support knowledge sharing and maintain integration quality across business customers.

Samuel, Son & Co.

Oakville, Ontario, Canada

IT Enterprise Architect / Software Engineer

May 2024 – Sep 2024

- **Steel Material Verification:** Leveraged GPT-4o vision capabilities to automate the comparison of received steel material forms with purchase orders. This system ensured the steel vendor delivered the correct materials, leading to an annual savings of approximately \$500,000 CAD by reducing discrepancies and material waste.
- **Implemented Monitoring System:** Set up a comprehensive monitoring system for warehouse machinery using Portainer and Docker to deploy InfluxDB, Telegraf, and Grafana. Telegraf connected to the company's MQTT broker, pushed data to an InfluxDB bucket, and sent it to Grafana. Designed customizable dashboards in Grafana displaying various machine metrics (pressure, temperature, etc.) Configured alerts to notify when metrics exceeded predefined thresholds, enhancing preventive maintenance and operational efficiency.
- **Shopify Integration:** Utilized Webhooks to connect the company's Shopify storefront with backend systems, streamlining order processing. Implemented a scheduler using Azure Functions to automate the pulling and pushing of order data via the Shopify API. This integration improved operational efficiency and ensured timely data flow for order management.

ADDITIONAL SKILLS

Programming & Data Manipulation: Python (pandas, NumPy, matplotlib) | SQL | BASH | JavaScript | Rust | C | Racket | GML | JSON | HTML + CSS

Data Engineering & Development Concepts: ETL & Data Transformation | API Integration & JSON Mapping | Data Quality & Validation | Observability / Monitoring | Containerization (Docker) | Microservices | Azure Data Lake / Blob Storage | Azure Functions | Azure Data Factory (ADF) | Pandas-based SQL querying | Flat-file / Parquet processing

Proficient Programs: Postman | Microsoft Office Suite | Docker / Portainer | InfluxDB | Telegraf | Grafana | Databricks | Azure Functions | Azure Data Factory

EDUCATION

University of Waterloo, Bachelor of Mathematics (BMath)

Waterloo, Ontario, Canada

Sep 2021 – Aug 2025 [Full-time]

University of Colorado Boulder, Master of Science in Computer Science (MS-CS)

Online (US)

Jan 2026 – Jan 2029 [Part-time]

CERTIFICATIONS

- Microsoft DP-900 – Azure Data Fundamentals
 - Google IT Automation with Python Specialization – **Coursera**
-
